

A quiet reading break

Aura demonstration PDF with selectable text

A quiet reading break can start with a single paragraph. You do not have to finish the whole book before you put it down.

Keep a sentence when it gives you something to return to. A short note can explain why you chose it, even after you have forgotten the surrounding page.

Try selecting this sentence and adding your own note. This is a demonstration document written for Aura's reading guides, not a published book or a customer document.

When you return, open the same copy from your library. Check your saved passage before moving on to the next chapter.
